715-395-1363 in advance of scheduled programs so that appropriate arrangements can be made.

**Douglas County Extension Education & Recycling Committee:** 

**Sue Hendrickson** Scott Luostari **Charlie Glazman Mary Lou Bergman Mary Stone-McConnell** 

UW-Extension is looking for the right person to join our team! We have an Extension Educator position open in the area of Human Development and Relationships. This is a half-time (50%) position to serve the communities and people of Douglas County. Initial educational topics for the team member to focus on will be parenting, relationships and financial security. The educator will build connections across the county in order to address needs that affect families, as well as provide family support programs in the county jail.

As a part of the University of Wisconsin System, educators in county-based offices enjoy a statewide network of colleagues to share resources, research and programming ideas, as well as support from specialists and coaches. The Human Development and Relationships Extension Educator is open for applications until March 23. To apply, go to: http://www.uwex.edu/about/careers/jobs.

Submitted by, Mary Pardee, Area Extension Director (Douglas, Bayfield, Ashland & Iron Counties)

### 33<sup>rd</sup> Superior Days

The 33<sup>rd</sup> Superior Days has now concluded. While a winter storm kept nearly 40 of our delegates and guests from attending, 110 delegates and guests still made it to

Madison to participate in Superior Days.

This was my third Superior Days. Something I come to appreciate more and more each year is the legacy that Superior Days has in Madison. I talked with now retired Department of Workforce Development Assistant Deputy Secretary David Anderson, who came back to Madison from Wausau just four days after retiring. David told me that in 33 years, he has only missed Superior Days twice. This loyalty to attending Superior Days and networking with delegates is a refrain I heard from many elected officials and staffers.

Our delegates lobbied in the Capitol on Tuesday afternoon, connecting with each senate and assembly office.

Delegates spoke to four issues: Better City Superior (SB 727), Medicaid rates for nursing homes, water resource protection, and increasing payment in lieu of taxes (PILT) rates. These issues may not get the media attention they deserve, but each is important to Northwest Wisconsin in its own way.

Delegates also had an opportunity to learn about what is happening in Madison during two keynotes. Mark O'Connell, Executive **Director of Wisconsin** 

Counties Association, spoke on Tuesday about the issues the legislature is tackling in the closing days of the session. Mr. O'Connell also provided an election preview for 2018 and used his WCA looking glass to predict some outcomes.

The delegation was also joined by Dr. Ray Cross, president of the UW System, and Dr. Morna Foy, president of Wisconsin

Technical Colleges. Their co-keynote focused on how their respective institutions are focused on meeting the changing needs of Wisconsin residents, responding to workforce shortages, and meeting challenges brought by recent economic development projects announced across the State of Wisconsin.

Finally, Superior Days isn't Superior Days without the evening reception and Best of Wisconsin's Northwest. This year 26 local

businesses and organizations traveled to Madison to display their products, services, or community. The reception is an opportunity for delegates and guests to renew old friendships and acquaintances in Madison and make new ones. Mayor Jim Paine often talks about the role that Superior Days plays in facilitating these relationships, and that these relationships are often leveraged far beyond the confines of the Superior Days event itself.

Until next year, when we convene for the 34<sup>th</sup> Superior Days on February 12 and 13, 2019.

James Anderson, III Community & Economic Development

### Agriculture

As the season progresses, the far north has the The first Youth for the Quality Care of Animals live advantage of watching what spring brings to the rest training was held late last month. A fine group of of the region allowing us to make some calculated youth worked through the topics of Animal Care and decisions about our farm management for 2018. Welfare, Feed and Nutrition, and Youth Leadership. I Indeed, one concern on the table in winter 2018 is am grateful to Darren Nyhus, Agriculture Educator lack of snow cover in much of the state, leaving areas and science teacher at Northwestern High School, of frozen alfalfa and potential winterkill. For our who presented these topics with me. Stressing that farmers in the position to sell forage, now is the time the consumer is demanding more and more of their to pull a forage sample to learn Relative Forage food supply...wanting to know how the animals are Quality (RFQ). For a small fee, farmers are raised and expecting high quality and safe meat. It is encouraged to mail a zip locked baggie of a random also fantastic to have the parents attend with their sample of hay to the UW Soils and Forage Testing lab youth. We learn from each other. in Marshfield. They will receive an analysis Horticulture indicating quality that they can use to market their Great news for the Superior Community Garden! A hay. Dairy farmers in particular look for this number lease has been signed with the City of Superior. The when they buy hay. Farmers can achieve a higher Association is planning in earnest on building the price for their product if they have the quality infrastructure this year. The goal will be increased number. Knowing the quality of your hay from year access to fresh local food in a neighborhood of need. to year, and field to field gives the farmer a measure The outcome is to manage around. And that is the definition of important to Douglas Sustainable Farming. I am available to help farmers County gardeners and pull samples, have them sent to the lab, and analyze non-gardeners alike. the results. I also have a drill that farmers can check Local food starts in out to pull samples. Now is the time!

I recently attended the Wisconsin Cover Crop Conference in Stevens Point. Cover crops are a useful and practical way to increase organic matter in the soil, as well as control erosion, decrease compaction, and aid in water infiltration. In our region, the window is short to incorporate this

"additional" crop into a the Douglas County single year's rotation. Courthouse, 6:00 pm. Where we can consider is **UW** Extension those fields where corn Douglas County will silage are removed or utilize the community small grains are harvested garden for demonstrations before late September. and as a teaching garden for all. Planting rye into these bare fields offers a quick cover and organic matter that can be planted into the following spring, or harvested and then planted to sovbeans or a hay mix. We have growers in Douglas

County that are developing this practice for their soils and rotations. I look forward to a field day or two to share how we can utilize cover crops on our farmland, increasing our outcome, decreasing our inputs....

Superior Days Youth Delegation

The 33<sup>rd</sup> Superior Days just wrapped up in Madison on February 21. While a big snow storm prevented some of our high school students from participating, it gave others opportunities to step into roles they had not anticipated being in, and they did a great job rising to speakers to the entire delegation and did so with tremendous poise. Additionally, almost all the lobby teams were missing members, forcing the remaining people to discuss issues they hadn't thoroughly researched. Like the adults, the students adapted to the situation and handled it well.

Youth delegates from Washburn High School gave a presentation to members of the Public Service Commission about their desire for Wisconsin to use more renewable energy. The students researched the environmental and financial benefits of wind and solar energy, including data from neighboring Minnesota. Photo taken by Sharon Krause

One of the highlights of the trip for me was the students' boldness. They were not shy about asking questions, posing many to Senator Baldwin's representative, Flora Csontos, during the Federal Update meeting. And at the youth banquet, the Q & A session after the speaker finished lasted half an hour!

The Youth Banquet Keynote Speaker was Michael Wagner of UW- Madison's College of Journalism and Mass Communications. He discussed research being done on "fake news" and media bias – as in, our bias towards news sources. Studies have shown that when presented with the same news, consumers tend to assume the reporting is negatively biased if it comes from a source they don't like. For example, liberals thought a report was biased when it supposedly came from Fox News and conservatives when it came from CNN, even though the report was as factual as possible and exactly the same for both groups. Other studies have shown that when it comes to changing one's mind about an issue, the group least likely to compromise are those who are the most highly educated because they seek and find facts that support their position. Wagner also talked about the impact of social media on

traditional news sources and gave tips on checking sources of news reports. The youth were very engaged and appreciative of his time.

Page 4

Overall, this year's Superior Days youth delegation seemed to have a deeper grasp of the issues than in the challenge. Several students stepped in to introduce years past. We had many seniors who had participated in the past, and there also seems to be heightened interest overall in what's happening in government. High schoolers are more aware of what's happening in the world than ever before, and many are ready to engage in their communities when given the chance. Superior Days provides just such an opportunity, and it was encouraging to see them make the most of it.

### Expanding Access

In December I co-led a focus group with the goal of obtaining data to help guide state-wide 4-H practices. A recent federal civil rights review found that Wisconsin 4-H needs to do a better job of reaching new audiences, and when I was approached to assist I was happy to do so. This is because I have been aware that while almost 70% of my volunteers live out in the county, 65% of Douglas County youth live in Superior. What's the best way to expand 4-H in the city, especially in neighborhoods without volunteers? The information we gathered will enable us to establish a new club in the city.

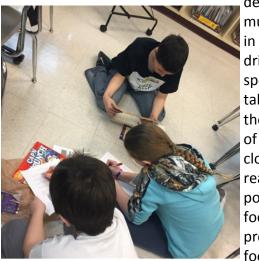

The focus group was arranged with help from the Superior Boys & Club on Caitlin Avenue, whom I had reached out to last year. Six parents shared what they look for when choosing extracurricular activities for their kids, and the best ways to reach them. We found that the vast majority of families in their neighborhood - perhaps 90% - do not have computers, so the best way to promote 4-H is with printed materials: Flyers on bulletin boards, notices in the Superior Housing Authority newsletter, etc. Once we get hold of them the affordability of 4-H, combined with all we have to

offer, makes us a very attractive option. We have options for meeting spaces, so all we need is volunteers! If you or someone you know is interested in helping establish a community club in the northern area of Superior, please contact the office.

Visiting 5th grade is always bittersweet. Most of these students I have taught since first grade. Seei them grow and mature over the years is just great. Having them recollect what they have been taught nutrition class is a bonus. We finished our five wee course in early February. I was very pleased many students could remember why we eat from each food group when we reviewed each week (what each food group does for us). We covered topics such as; why calcium is important, ways to increase our fruit and vegetable consumption, how to read food labels, choosing healthy snacks and how to

determine he much sugar in foods and drinks. We al spent a lesso talking about the importar of eating as close to the real food as possible (wh food versus processed 🖊 foods).

The picture shows students working together in groups where they had to answer specific questions about foods using real food labels. This hands on activity helped students become more comfortable in reading labels and to know where certain nutrients were located on the label. I had several students the following weeks tell me they looked at and compared labels at home. Some shared what they had learned about certain cereals, snack items, certain milk and milk products and candy bars. It will be nice to hopefully see these students again in 7th grade.

### Food for Thought...Healthy Retail

Stores are willing to buy and sell foods that their customers are willing to purchase. Many times stores choose foods that have a longer shelf life to ensure they will be able to sell the item before it goes bad.

This is why many food stores struggle to provide a variety of fresh fruits and vegetables. While they know the food option is important for their
